INTERNSHIP

Data analyst, Upskillz

August 2022 to October 2022

- It was a great opportunity to work as a data analyst intern at Upskillz in collaboration with IIT-KGP, where I worked on some data sets and analyzed those using python libraries and tableau.

PROJECTS

Creating a local Database and storing required information in it

August 2021

- Created a local database using MySQL and linked it with the form which was created with Python and all the data was stored in the local databases.

Stock market analysis

October 2022

- used python to analyze the stock of some big companies and how they will perform in the next few years and the information was visualized using Tableau .
